

## **RULES FOR COMPETITION «ROBOCUPJUNIOR ONSTAGE» REQUIREMENTS FOR ROBOTS MATERIALS**

*Version 1.0 of August 14, 2018.*

1. General rules	2
2. Photo requirements	2
3. Content description requirements	2
4. Video clip content requirements	2
5. Several disciplines registration	3
6. History of changes	4

## 1. General rules

This annex to the rules for «RoboCupJunior onStage» sets the requirements for materials, which should be provided by each team, that participate in selection for «RoboFinist» festival in «RoboCupJunior onStage» category.

These materials should be provided in order to demonstrate working capacity of the robots that are going to participate in this competition. The materials should be provided during the registration. The team, which hasn't provided these materials won't be able to participate in the competition. An application that has the materials which don't meet the requirements of this annex can be declined by the competition organizers.

The list of materials that should be provided to take part in selection:

- photo;
- description;
- video clip.

The selection criteria for «RoboCupJunior onStage» is the best description and video clip of the project.

## 2. Photo requirements

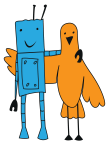

A real robot should be placed in the center of the photo. It should be in focus and take the major part of the photo.

## 3. Content description requirements

The robot description should be no less than 500 symbols. It should be notified in the description which platform was used to build a robot. The construction of the robot also needs description, as well as a list of all the sensors. In the conclusion the uniqueness of the robot and its purpose should be clarified.

## 4. Video clip content requirements

1-2 minutes long stage performance should be demonstrated in the video clip. Artistic and entertaining qualities as well as innovation and technological advances will be taken into account.

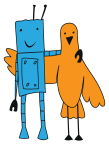

No cutting (montage) is permitted in the video clip (there is only one exception, described in 5th issue of this annex). There has to be an A4 piece of paper with clearly written name of the team and date of shooting.

All team members should be presented in a shot. The length of the video clip should be no longer than 3 minutes.

## **5. Several disciplines registration**

If one robot participates in several competitions, it is possible to assemble together a few clips. But all time stamps should be pointed out in the description of an application, so it would be easier to find the right clip for a right competition.
